

A&E attendances continued at 2.1 m in September like the previous 4 months. A&E levels are reaching pre-pandemic levels of activity. Major A&E Unit attendances at 1.4m are at record levels but Minor A&E unit attendances are still 10k below pre-pandemic levels. Some 75% of attendances at A&E result in admission.

Total hospital “Emergency admissions” were 507k with 385k coming via A&E and 121k coming through other departments.

RMS will continue sending you data on the trends in Secondary and Primary Care to help guide you in your planning of direct marketing activity as we move forwards out of lockdown. **If you want further detail (like regional data) please contact us directly to discuss your needs.**
